## **Executive Summary**

### Introduction to the Executive Summary

The purpose of the University of Illinois Chicago All Campus Climate Assessment is to examine whether our university's values of diversity, equity, and inclusion are reflected in the daily experiences of students, faculty, and staff. This assessment began with a diversity, equity, and inclusion survey administered during the Fall 2023 semester. Analyzing the responses to the Fall 2023 survey will allow us to establish a baseline understanding of how various groups experience the campus climate and the current challenges. We will use future studies to assess longitudinal changes.

This executive summary is intended to provide a high-level snapshot of the Illinois 2023 DEI survey results.

### **Study Overview**

To assess the current campus climate, the University of Illinois Chicago conducted a survey in 2023 on Diversity, Equity and Inclusion (DEI). This survey was designed to help university leaders and campus communities develop a baseline understanding of the climate relating to diversity, equity, and inclusion. Information was gathered from faculty, staff, and students relating to their perceptions, experiences, and perspectives relative to these topics. The survey results will help inform current and future decisions to support a diverse, inclusive, and welcoming community and serve as a benchmark against which to measure change over time. As stated in our mission, the University of Illinois Chicago "is charged by our state to enhance the lives of all people in Illinois, across the nation, and around the world through our leadership, discovery, engagement, and economic development."

This document is intended to provide a high-level summary of the DEI All Campus Climate Assessment.

## **Data Collection**

The survey was launched on November 7, 2023 and closed on December 31, 2023. All eligible University of Illinois Chicago undergraduate students, graduate students, staff, and faculty were invited to participate. Of the 63358 individuals who were invited and not excluded as ineligible, 16666 responses were collected, yielding an overall response rate of 26.3% and completion rate of 82.3%.

### **Response Rates by Population**

#### Executive Summary - Table 1: Response & Completion Rates by Population

	Eligible Sample	Partial Responses	Completed Responses	Response Rate	Completion Rate
Undergraduate Students	32082	1328	4373	17.8%	76.7%
Graduate Students	18410	904	3394	23.3%	79.0%
Staff	9347	516	4417	52.8%	89.5%
Faculty	3519	208	1526	49.3%	88.0%
Total	63358	2956	13710	26.3%	82.3%

### **Demographics**

### **Executive Summary - Table 2: Gender Identity by Population**

	Undergraduate Graduate Students Students		Sta	aff	Faculty			
Man	38.6%	(1066)	44.4%	(976)	35.0%	(963)	48.5%	(445)
Woman	58.8%	(1625)	52.7%	(1160)	63.5%	(1750)	48.7%	(447)
Transgender/Gender Non-Conforming	1.8%	(51)	2.1%	(47)	0.9%	(24)	1.2%	(11)
Response not listed	0.8%	(22)	0.8%	(17)	0.7%	(18)	1.5%	(14)

#### **Executive Summary - Table 3: Race/Ethnicity by Population**

† Question: What is your gender/gender identity? (S Executive Summary - Table 3: Race/Ethnicity								
		raduate	Grad Stude		Sta	aff	Facu	lty
African American/Black	4.7%	(131)	6.3%	(139)	7.8%	(215)	5.4%	(49)
Asian American/Asian	29.2%	(814)	38.0%	(837)	5.3%	(145)	16.4%	(150)
Hispanic/Latino/a	10.3%	(286)	6.2%	(137)	3.3%	(90)	6.5%	(59)
Middle Eastern/North African	1.5%	(42)	1.8%	(40)	0.4%	(12)	2.4%	(22)
Native American/Alaskan Native			0.1%	(3)	0.2%	(6)	0.2%	(2)
Native Hawaiian/Other Pacific Islander	0.1%	(2)	0.0%	(1)	0.1%	(2)	_	
White	44.4%	(1237)	37.3%	(822)	76.9%	(2109)	61.1%	(558)
Multiracial	9.5%	(265)	7.1%	(157)	4.7%	(129)	5.3%	(48)
Response not listed	0.4%	(12)	3.0%	(65)	1.3%	(35)	2.7%	(25)

† Question: Please indicate the racial or ethnic group(s) with which you identify. (Select all that apply)

† Note: This question was asked in a manner that allowed responders to select multiple categories. For these results, we have collapsed anyone who selected multiple categories into "Multiracial." Only those who answered with only one category are included in the individual race/ethnicity categories.

### **Executive Summary - Table 4: Sexual Orientation by Population**

	Undergraduate Students	Graduate Students	Staff	Faculty
Heterosexual	70.0% (1931)	<b>71.5</b> % (1551)	<b>80.8</b> % (2177)	<b>79.2</b> % (715)
LGBQA+	<b>27.8</b> % (768)	<b>25.7</b> % (557)	<b>16.9</b> % (454)	<b>18.3</b> % (165)
Response not listed	<b>2.2</b> % (60)	<b>2.8</b> % (61)	<b>2.3</b> % (63)	<b>2.5</b> % (23)

† Question: What is your sexual orientation?

### **Executive Summary - Table 5: Religious Affiliation by Population**

		Undergraduate Students		Graduate Students		Staff		ılty
Atheist	12.5%	(344)	10.7%	(231)	8.6%	(231)	15.5%	(138)
Agnostic	12.4%	(340)	10.1%	(218)	9.0%	(241)	10.4%	(93)
Buddhist	2.2%	(61)	3.0%	(66)	1.0%	(28)	3.4%	(30)
Christian [Including Christian, Catholic, The Church of Jesus Christ of Latter-day Saints (Mormons), and Protestant]	42.2%	(1158)	34.5%	(749)	58.1%	(1556)	37.7%	(336)
Hindu	7.4%	(203)	14.9%	(324)	0.8%	(22)	3.5%	(31)
Jewish	3.3%	(91)	2.5%	(54)	1.3%	(34)	6.8%	(61)
Muslim	3.2%	(88)	5.0%	(108)	0.9%	(25)	3.4%	(30)
Additional Religions	3.8%	(104)	5.2%	(112)	5.9%	(157)	5.2%	(46)
Nothing in particular	12.9%	(353)	14.2%	(307)	14.3%	(384)	14.1%	(126)

† Question: With what religion (if any) do you most identify?

#### Executive Summary - Table 6: Military Service by Population

	Undergraduate Students		Graduate Students		Staff		Faculty	
Current or past military service	1.6%	(44)	2.3%	(50)	4.6%	(127)	1.1%	(10)

† Question: Have you ever served in the U.S. Armed Forces, Military Reserves, or National Guard?

#### Executive Summary - Table 7: First Generation College Student by Population

	Undergraduate Students		Graduate Students		Staff		Faculty	
Parent/guardian education less than a Bachelor's degree	27.8%	(711)	27.0%	(549)	49.1%	(1309)	30.8%	(273)

† Question: What is the highest level of formal education obtained by any of your parent(s) or guardian(s)?

#### **Executive Summary - Table 8: International Status by Population**

	Undergr Stude		Grad Stude		Staf	:	Facu	llty
International status	6.8%	(190)	38.3%	(849)	1.7%	(47)	15.0%	(139)
† The variable was provided by the University of Illin	iois.							

#### Executive Summary - Table 9: Disability Status by Population

	Undergraduate Students		Graduate Students		Staff		Faculty	
Yes, I have a disability	10.6%	(296)	13.0%	(286)	15.6%	(428)	13.2%	(122)
+ Do you have a disability?								

† Do you have a disability?

### **Overall Campus Climate**

# Executive Summary - Table 10: Satisfaction with Overall Illinois Campus Climate in the Past 12 Months by Population

	Undergraduate Students	Graduate Students	Staff	Faculty
Satisfied/Very Satisfied	<b>69.3</b> % (1938)	<b>65.8</b> % (1453)	<b>58.6</b> % (1620)	<b>65.4</b> % (605)

† Question: How satisfied or dissatisfied are you with the overall campus climate/environment that you have experienced at the University of Illinois within the past 12 months? (If you have been at the university for under 12 months, please consider the time that you have been here.)

#### Executive Summary - Table 11: Satisfaction with Illinois Support for DEI in the Last 3 Years by Population

	Undergraduate Students	Graduate Students	Staff	Faculty
Satisfied/Very Satisfied	<b>55.5</b> % (1551)	50.6% (1117)	<b>54.0</b> % (1487)	<b>54.7</b> % (504)

† Question: How satisfied are you with the institution's actions in support of its commitment to diversity in the last three years? (If you have been at the University of Illinois for less than 3 years, please consider the progress you have seen during the time that you have been here.)

#### Executive Summary - Table 12: How Well Illinois is Doing in Comparison With Other Institutions by Population

	Undergraduate Students	Graduate Students	Staff	Faculty	
Better than most / Among the very best	<b>53.3</b> % (1472)	<b>44.6</b> % (963)	<b>41.6</b> % (1116)	<b>41.6</b> % (371)	
+ Question: How well do you think the University of Illinois is doing in relation to DEI compared to other institutions?					

### **Discriminatory Events**

# Executive Summary - Table 13: Experienced At Least One Discriminatory Event by Type in Order of Reported Experiences - Undergraduate Students

† Question: Over the past 12 months, how often have YOU experienced discriminatory events in your department/unit because of your: (If you have been at the University of Illinois for under 12 months, please consider your experiences during the time that you have been here.)

### Areas of Strength and Improvement

## Executive Summary - Table 14: Individual Dimension Category Mean Scores Ordered by Highest to Lowest - Undergraduate Students

	Underg Stud	raduate ents
Unwelcoming / Welcoming	5.6	(2789)
Hostile / Friendly	5.5	(2783)
Homogenous / Diverse	5.4	(2779)
Homophobic / Non-homophobic	5.4	(2781)
Disrespectful / Respectful	5.4	(2782)
Unsupportive / Supportive	5.4	(2785)
Ableist / Accessible	5.3	(2780)
Transphobic / Non-transphobic	5.2	(2776)
Racist / Non-racist	5.2	(2782)
Ageist / Non-ageist	5.1	(2772)
Sexist / Non-sexist	5.0	(2780)
Contentious / Collegial	4.6	(2747)
Individualistic / Collaborative	4.6	(2778)
Elitist / Non-elitist	4.2	(2776)
Competitive / Cooperative	3.9	(2781)

† Question: Thinking of the words [LEFT WORD] and [RIGHT WORD], where 1 represents [LEFT WORD] and 7 represents [RIGHT WORD]. On the scale of 1 to 7, including all values in between, which adjective best represents how you would rate the University of Illinois based on your direct experiences?

## Executive Summary - Table 14.1: Individual Dimension Category Mean Scores Ordered by Highest to Lowest - Graduate Students

	Graduate S	Students
Hostile / Friendly	5.6	(2199)
Disrespectful / Respectful	5.6	(2196)
Unwelcoming / Welcoming	5.6	(2186)
Homophobic / Non-homophobic	5.6	(2170)
Unsupportive / Supportive	5.5	(2185)
Homogenous / Diverse	5.3	(2196)
Ableist / Accessible	5.3	(2188)
Transphobic / Non-transphobic	5.3	(2169)
Racist / Non-racist	5.2	(2191)
Sexist / Non-sexist	5.2	(2184)
Ageist / Non-ageist	5.1	(2174)
Contentious / Collegial	5.0	(2167)
Individualistic / Collaborative	4.8	(2191)
Competitive / Cooperative	4.5	(2188)
Elitist / Non-elitist	4.3	(2174)

† Question: Thinking of the words [LEFT WORD] and [RIGHT WORD], where 1 represents [LEFT WORD] and 7 represents [RIGHT WORD]. On the scale of 1 to 7, including all values in between, which adjective best represents how you would rate the University of Illinois based on your direct experiences?

# Executive Summary - Table 14.2: Individual Dimension Category Mean Scores Ordered by Highest to Lowest - Staff

	Stat	ff
Homophobic / Non-homophobic	5.4	(2711)
Hostile / Friendly	5.3	(2744)
Unwelcoming / Welcoming	5.3	(2740)
Disrespectful / Respectful	5.3	(2747)
Homogenous / Diverse	5.2	(2734)
Unsupportive / Supportive	5.2	(2740)
Ableist / Accessible	5.2	(2726)
Transphobic / Non-transphobic	5.1	(2689)
Racist / Non-racist	5.0	(2738)
Contentious / Collegial	4.8	(2695)
Individualistic / Collaborative	4.7	(2717)
Ageist / Non-ageist	4.7	(2708)
Sexist / Non-sexist	4.6	(2717)
Competitive / Cooperative	4.2	(2722)
Elitist / Non-elitist	3.7	(2715)

† Question: Thinking of the words [LEFT WORD] and [RIGHT WORD], where 1 represents [LEFT WORD] and 7 represents [RIGHT WORD]. On the scale of 1 to 7, including all values in between, which adjective best represents how you would rate the University of Illinois based on your direct experiences?

## Executive Summary - Table 14.3: Individual Dimension Category Mean Scores Ordered by Highest to Lowest - Faculty

	Facu	lty
Homophobic / Non-homophobic	5.4	(903)
Hostile / Friendly	5.4	(915)
Disrespectful / Respectful	5.4	(914)
Unwelcoming / Welcoming	5.3	(915)
Unsupportive / Supportive	5.2	(915)
Ableist / Accessible	5.1	(907)
Transphobic / Non-transphobic	5.0	(897)
Contentious / Collegial	5.0	(910)
Homogenous / Diverse	4.9	(911)
Racist / Non-racist	4.9	(908)
Ageist / Non-ageist	4.9	(900)
Sexist / Non-sexist	4.6	(909)
Individualistic / Collaborative	4.5	(914)
Competitive / Cooperative	4.3	(913)
Elitist / Non-elitist	3.9	(908)

† Question: Thinking of the words [LEFT WORD] and [RIGHT WORD], where 1 represents [LEFT WORD] and 7 represents [RIGHT WORD]. On the scale of 1 to 7, including all values in between, which adjective best represents how you would rate the University of Illinois based on your direct experiences?

### **Custom Indices with DEI Aspects**

#### Executive Summary - Table 15: Custom DEI Aspects Indices by Population

	Undergraduate Students	Graduate Students	Staff	Faculty
Sense of Belonging	<b>3.9</b> (2738)	<b>3.8</b> (2176)	<b>3.6</b> (2747)	<b>3.7</b> (916)
DEI Commitment	<b>3.7</b> (2716)	<b>3.6</b> (2166)	<b>3.6</b> (2740)	<b>3.6</b> (914)
Opportunities for Success	<b>3.9</b> (2729)	<b>3.9</b> (2179)	<b>3.6</b> (2745)	<b>3.8</b> (917)

† Items have been combined to create three general scales to provide a better understanding of Sense of Belonging, DEI Commitment, and Opportunities for Success. People could respond from 1 () to 5 () on the items, which we averaged together to give us a general sense for each of these domains. For a discussion of how these scales were calculated, see the main report.

## Introduction

The University of Illinois Chicago is dedicated to cultivating a university community that encourages constructive participation in a diverse, multicultural world. Illinois has a commitment to supporting initiatives that foster safe and inclusive learning and working environments.

To assess the current campus climate, SoundRocket, a social science survey research firm located in Ann Arbor, Michigan, was contracted to conduct a survey on Diversity, Equity and Inclusion among the Illinois community. This survey was administered in Fall 2023. See Part II for details about the specific populations included in this survey.

The survey was designed to help develop shared knowledge around diversity, equity and inclusion at Illinois through learning about our campus community's perspectives, opinions and experiences related to these topics. Data collected in the Fall 2023 DEI survey will establish a baseline understanding of the present climate, help inform current and future decisions about how best to support a diverse, inclusive, and vibrant campus community, and serve as a benchmark against which to measure change over time.

## **Institutional Context**

This survey was administered to the University of Illinois Chicago community between November 7 through December 31, 2023. This period was also marked by several international conflicts, including the first months of the Israel-Hamas War and the continuing war in Ukraine. The results below reflect the responses our community members shared during this moment of raised tensions on university campuses across the country, including at Illinois.

### **Background & Methods**

This survey was conducted among the populations defined below, using industry-standard methodologies for social science data collection. The study was designed to minimize biases from the perspective of the questionnaire, sampling, and reporting.

### **Census Data Collection Strategy**

The study was conducted as a census of the full community population at the institution. General eligibility to be included in the survey was determined as follows:

- Participants must have been 18 or older as of the eligibility date defined below.
- Participants must have been affiliated with the institution as of the eligibility date below.
- Participants must have been physically located within the United States when they took the survey.

The specific population eligibility dates and other related qualifications were defined as:

- Population A: Students
  - Eligibility Date: Participants were eligible if they were enrolled at the institution on a part—or full-time basis as students as of October 9, 2023.
  - Students were included if their physical address included a country in the (European Economic Area (EEA), UK or China.
  - Students were excluded if they were enrolled in study abroad.
- Population B: Employees
  - Eligibility Date: Participants were eligible if employed as permanent staff or faculty as of October 9, 2023.
  - Employees were excluded if their physical address included a country in the (European Economic Area (EEA), UK or China.
  - Employees considered extra help and academic hourly were excluded.

The institution provided SoundRocket with each population file including all potentially eligible participants and transferred the data using a secure data transfer platform. SoundRocket does not share or sell customer lists, has pledged to maintain this information confidential, and promised to destroy the lists after this study is completed.

### The Campus Climate Questionnaire

The questionnaire was developed originally via a collaboration between SoundRocket and a research team at the University of Michigan. A revised version of the original instrument was adapted in collaboration with a team of DEI leaders from the University of Illinois, Rutgers University, and the University of Minnesota for use at multiple campuses. The final instrument fielded to the University of Illinois community was agreed to collaboratively between SoundRocket and the university.

The resulting questionnaire is standardized to allow for future comparisons but also tailored so that the institution may gain a nuanced understanding of the climate on campus.

The survey was designed as a self-administered, interactive, mobile-friendly web-based survey.

The final questionnaire was structured as follows:

### Welcome

A brief description of the survey and its key objectives, a statement of confidentiality, a note regarding voluntary participation and survey length, information about incentives, and contact information for the SoundRocket survey team.

### Consent

An informed, passive consent, wherein study details about the nature and purpose of the research were provided and participants clicked "Next" if they agreed to participate.

### Demographics

Questions were asked to capture the demographics of each participant, including (but not limited to) gender, race/ethnicity, sexual orientation, religious affiliation, disability, military status, citizenship, and other related descriptors.

### **Campus Climate**

Questions were asked about satisfaction with the campus climate; perceptions of attributes related to diversity, equity, and inclusion; individual opinions about DEI; frequency of interactions with diverse people; discriminatory events personally experienced; and ratings regarding aspects of being a community member.

### Unit-Level Climate and COVID Experiences

Questions were asked about satisfaction with the campus climate at the unit level, individual opinions about DEI at the unit level, discriminatory events personally experienced at the unit level, and the adverse effects of COVID-19 in various areas.

### Web-based Survey Data Collection

The survey was administered as a web-based survey. It was optimized so that it could be completed successfully on mobile devices and tablets as well as desktop or laptop computers. Mobile optimization was implemented dynamically during the survey —if the system detected that a mobile-sized screen was in use, it automatically adjusted the view to accommodate the device.

### Paper Survey

To be more inclusive to staff members who may not have access to a computer, a paper version of the survey was mailed to the University of Illinois Human Resources Department for distribution to approximately 700 select staff. Staff who received the paper survey were then able to mail the survey directly using pre-paid postage envelopes to SoundRocket.

## Section A - Students (Undergraduate & Graduate Students)

### Part 1: Data Collection & Methods

The population-specific to each section of this report is noted in each section header. Section A includes the results for the following:

- Population A: Students
  - Enrolled part- or full-time at the institution as a student as of October 9, 2023.
  - Participants must have been 18 years old or older as of October 9, 2023.
  - A total of 32102 undergraduate and 18628 graduate students were invited to participate in the survey.
  - Participants must have been in the United States at time of taking survey.

The following population-specific data collection methods were used to maximize the quality of this survey.

### **Respondent Incentives**

To encourage participation, all eligible study participants were entered into a random drawing to win various prizes.

- \$50 Amazon e-gift cards
- \$25 Amazon e-gift cards
- \$10 Amazon e-gift cards
- \$5 Amazon e-gift cards
- 500 Illinois Promotional Swag (T-Shirts, I-Block Winter Scarfs, I-Socks, I-Water Bottles).
- Grand Prize: Invitation to participate as an extra in a video featuring Chancellor Jones. (As part of this experience, they received a professional quality selfie with Chancellor Jones taken during the video shoot, as well as a personal email from him sharing the final video with the family member or friend of their choice.)

The random drawing was conducted after data collection was completed, and the university delivered the incentive to the winners.

### **Data Collection Schedule**

The overall data collection design protocol included:

- Invitation Email was sent on November 7, 2023
- Reminder 1 Email was sent on November 12, 2023
- Reminder 2 Email was sent on November 15, 2023
- Reminder 3 Email was sent on November 20, 2023
- Reminder 4 Email was sent on November 25, 2023
- Reminder 5 Email was sent on November 27, 2023
- Reminder 6 Email was sent on November 30, 2023

The dates identified above for each data collection invitation represent the date the first communications (of each type) were sent. While most of the communications would have been sent the same day, depending on the time of day and any necessary data quality checks performed, some individuals may have received their communications on the next calendar day.

### **Survey Completion Time**

Determining the time taken to participate in a web-based survey is not straightforward; however, standard practices were employed to calculate the average length of time for respondents to complete this survey.

The completion time for the questionnaire was calculated by computing the elapsed time between when the participant initially logged in and when they clicked submit on the final page of the web survey. Because participants could leave the survey and return to it later (returning to where they left off), which would lead to extended time durations "in" the survey, only individuals who completed the full survey in one session were included in this calculation.

Additionally, some participants may have completed a portion of the survey and remained logged in, but they may have been called away from the survey or distracted by other tasks. As such, we often find many outliers in the total time variable. As such, our standard practice to identify the outliers is to determine the median number of minutes spent in the survey by those who completed the survey in one session. A top-end outlier range was then set to be three times the median value. For example, if the initial median completion time was 15 minutes; anyone who took more than 45 minutes was considered an outlier who likely did not spend that full time working on the questionnaire. Anyone above three times the median time was also excluded from the final length calculation. This is a standard practice in the survey research industry to estimate an accurate time to complete a webbased survey. Because of the variability involved in estimating completion time, we only estimate one overall completion time across all populations in the study.

Web survey completion timetables show final estimates for the length of the web-based survey among the population identified in this section of the report.

#### Section A - Table 1: Web Survey Completion Time (Minutes) for All Study Participants

	Original Median Time to Complete in minutes	Reasonable Maximum Time in minutes	Mean Time to Complete in minutes
All Participants	13.0	39.0	14.4

### Part 2: Dispositions & Response Rates

Disposition codes, response rates, and completion rates presented in this report are based on Standard Definitions as described by The American Association for Public Opinion Research (AAPOR) in their 2011 publication: Standard Definitions: Final Dispositions of Case Codes and Outcome Rates for Surveys, 7th edition.

### **Final Study Dispositions**

Survey dispositions were defined as follows:

- Eligible: An individual is determined to be eligible to participate if they were provided in the original sample file and they are determined to meet the eligibility criteria. Often some individuals are excluded from final eligibility due to them being duplicated in the file, they don't meet the age criteria, etc.
- Partial: An individual who consented but did not click "Submit Results" at the end of the survey.
- **Complete**: An individual who consented to participate and clicked through the entire survey (answering all or some questions), completed the incentive questions, and clicked "Submit Results."
- Ineligible: A case initially thought eligible to participate but determined not to be eligible (e.g., due to not being at least 18 years old); ineligible cases were removed from the denominator of all response rate calculations.

### **Response Rates**

Response rates for the survey were calculated as follows:

- Response Rate: Number of completes (c) plus the number of partials (p) divided by the eligible (e) sample size. This
  calculation follows AAPOR response rate calculation #2: ((c+p)/e).
- Completion Rate: Number of completes (c) divided by the sum of completes (c) plus partials (p): (c/(c+p)).

An individual is considered to have responded to the survey if their submission met the stated criteria to be considered a complete or a partial. Data from all such cases is included in this report. Response and completion rates are shown for the total number of individuals at the University of Illinois who responded to the survey.

#### Section A - Table 2: Response & Completion Rates by Student Population

	Eligible Sample	Partial Responses	Completed Responses	Response Rate	Completion Rate
Undergraduate Students	32082	1328	4373	17.8%	76.7%
Graduate Students	18410	904	3394	23.3%	79.0%
Total	50492	2232	7767	19.8%	77.7%

### Part 3: Results

### **Reading the Results**

Because the study was designed in part to provide insights and information that could be used to assist in developing programs, key comparison groups are included in the tables. Summary tables in this report include a total column named "Total." This column shows the combined data of all individuals who completed the survey from among the population defined by this report.

Due to the nature of the voluntary confidential survey, respondents were not required to answer any substantive questions. Only two questions where required to proceed in the survey. One question asked if the study participant was responding to the survey from a location in the U.S. The second asked for their age. These items were necessary to confirm eligibility in the survey.

To preserve confidentiality, the following criteria was used to determine if data would be suppressed:

Data is suppressed at the column level in this report. This means that for any column represented in the tables included in this report, we evaluated the total number of cases (responses) included to generate the statistics shown in the column. If there were fewer than 15 cases represented, all data for the column was suppressed, and a dash (—) was shown in each suppressed cell.

The exception to this rule is in the Demographics tables of this report, no suppression was implemented. The Demographics tables include:

- Executive Summary Tables 2 through 9.
- Section A Tables 3, 3.1, and 3.2.
- Section B Tables 3, 3.1, and 3.2.

This suppression strategy was applied to the overall University of Illinois Urbana-Champaign report.

All suppressed data will be shown as a dash (-) within the data cell.

### Interpreting the Results

This effort is intended to provide the institution with the data and results so that local individuals can use them, together with their local knowledge of these issues, to come up with interpretations and meaning.

 $\checkmark$ 

## Part 4: Demographics

To best understand the survey results, it is important to get an understanding of who completed the survey. The first section of the survey asked about several background and demographic elements. Characteristics of the responding population identified in the header of this report are shown in the Selected Demographics tables.

#### Section A - Table 4: Collapsed Race (BIPOC) Demographic Distribution of Respondents by Student Population

				Undergraduate Students	Graduate Students
BIPOC				<b>55.6</b> % (1552)	<b>62.7</b> % (1379)
White				<b>44.4</b> % (1237)	<b>37.3</b> % (822)

### **Primary Demographics**

† Note: This question was asked in a manner that allowed responders to select multiple categories. For these results, we have collapsed anyone who selected multiple categories into "Multiracial." Only those who answered with only one category are included in the individual race/ethnicity categories.

### Black, Indigenous & People of Color (BIPOC) and Gender Reporting

We recognize the critical need to disaggregate the data in order to understand the experiences of diverse communities at the University of Illinois. The data in this report is disaggregated by race/ethnicity and gender except in places where breakouts of individual race/ethnicity and gender categories will result in cell sizes that are too small to report. Therefore, we are also presenting a collapsed version of race/ethnicity, which is abbreviated in report columns as BIPOC (meaning "Black, Indigenous, and People of Color"). This category will include any participant who identified as African American/Black, Asian American/Asian, Hispanic/Latino/a, Middle Eastern/North African, Native American/Alaskan Native, Native Hawaiian/Other Pacific Islander, or Multiracial. Gender identity categories are Woman, Man, and Transgender/Gender Non-Conforming.

The following tables represent the distribution of the BIPOC and gender identity categories for all of the populations identified in the header of this report section.

#### Section A - Table 4: Collapsed Race (BIPOC) Demographic Distribution of Respondents by Student Population

			Underg Stude	raduate ents	Grad Stude	
BIPOC			55.6%	(1552)	62.7%	(1379)
White			44.4%	(1237)	37.3%	(822)

In the report that follows, most of the measures captured are broken down by gender and by both the BIPOC categories as well as the full racial breakdown. For the purpose of this reporting, all responders who identified more than one racial category were grouped as multiracial.

## Part 5: DEI Perceptions & Experiences: Campus Overall

Next, respondents were asked to rate their overall satisfaction with the campus climate/environment based on their experiences in the past 12 months.

#### Section A - Table 5: Satisfaction with Overall Campus Climate by Student Population

Participants were asked about their level of satisfaction with the university's commitment to DEI over the past three years. Next, they were asked to rate the DEI climate compared to three years ago. Participants who had been at the institution for less than three years were instructed to consider their time there when answering the question.

After considering the DEI climate at the institution over the past three years, survey participants reflected on several sets of opposite DEI-related aspects using a semantic differential scale. In this scale, polar adjectives (opposite-meaning terms) are shown. Survey participants select a rating for each aspect that they feel best represents their perception of the entity being studied – in this case, individual perceptions of the overall campus community.

In the following chart, the higher the mean score shown in each bar, the closer ratings were to the positive attribute in each set of adjectives located on the right. A 7-point scale was used to evaluate the paired adjectives, thus the mean values in the following tables utilize the same scale.

† Note: respondents chose one of seven radio buttons in the survey spaced equally between opposite attributes; for analysis purposes, a 7-point scale was used in which 1=negative attribute and 7=positive attribute, mean ratings are calculated based on this 7-point scale.

#### Section A - Table 11: Student Perceptions of Overall DEI Aspects (Mean Ratings)† - Graduate Students

† Note: respondents chose one of seven radio buttons in the survey spaced equally between opposite attributes; for analysis purposes, a 7-point scale was used in which 1=negative attribute and 7=positive attribute, mean ratings are calculated based on this 7-point scale.

Exploratory factor analysis (EFA) is a statistical technique that condenses data by grouping variables into factors (sets of variables) based on shared variance, the statistical index of the degree to which two variables are associated (shared variance is indicated by correlation coefficients). Thus, the goal of EFA is to identify related underlying constructs within the survey responses to help make the data more comprehensible and useful for practical applications.

The EFA on the semantic differential items answered identified two factors, which included thirteen of the dimensions items: (1) General Climate Elements and (2) DEI Climate Elements. The variables that make up each of the factors are:

	_
Factor 1 General Climate Elements	
Hostile / Friendly	
Disrespectful / Respectful	
Contentious / Collegial	
Individualistic / Collaborative	
Competitive / Cooperative	
Unsupportive / Supportive	
Unwelcoming / Welcoming	
	1

Factor 2 DEI Climate Elements Racist / Non-racist Sexist / Non-sexist Homophobic / Non-homophobic Ageist / Non-ageist Transphobic / Non-transphobic Homogenous / Diverse

Survey participants were asked to respond to a series of questions about various aspects, experiences, and perceptions of working or studying at their campus. Individuals rated their level of agreement with each statement using the following five-point scale: Strongly Disagree (1), Disagree (2), Neither Agree Nor Disagree (3), Agree (4), Strongly Agree (5). The following table shows combined responses for "Agree" plus "Strongly Agree" (4 + 5) ratings.

To further explore the aspects asked about in the previous tables, we calculated three Custom indices to provide insight about Sense of Belonging, DEI Commitment, and Opportunities for Success. Each question allowed the participant to answer Strongly Disagree, Disagree, Neither Agree nor Disagree, Agree, or Strongly Agree. We converted these categories into numeric values, assigning 1 to Strongly Disagree up through 5 to Strongly Agree. Where an item was reversed to reflect a negative experience instead of a positive one, the scoring was reversed as well, as indicated below.

We then calculated a mean composite score for each index. Each index contains a different question set which is listed below. A case must have had at least two of the items to be calculated—otherwise, the mean was not calculated and the case was not included in the analysis.

#### Sense of Belonging

- I feel valued as an individual at the University of Illinois.
- I feel I belong at the University of Illinois.
- I have found one or more communities or groups where I feel I belong at the University of Illinois.
- I have considered leaving the University of Illinois because I felt isolated or unwelcomed. (Reverse Coded)

#### **DEI Commitment**

- The University of Illinois has a strong commitment to diversity, equity, and inclusion.
- There is too much emphasis put on issues of diversity, equity, and inclusion here at the University of Illinois. (Reverse Coded)
- The University of Illinois provides sufficient programs and resources to foster the success of a diverse student body/staff/community of scholars.

#### **Opportunities for Success**

- I am treated with respect at the University of Illinois.
- I feel others don't value my opinions at the University of Illinois. (Reverse Coded)
- I have opportunities at the University of Illinois for academic/professional success that are similar to those of my peers/colleagues.
- My experience at the University of Illinois has had a positive influence on my academic/professional growth.

A few survey questions directly focused on interactions with others, as well as personal experiences with discriminatory events in the past 12 months. Survey participants first considered the characteristics of individuals at their campus with whom they interact in a meaningful way on a regular basis.

The survey continued with questions related to whether survey participants have personally felt or experienced some form of discrimination at their campus during the past 12 months. There were two primary items within each discrimination group—first, participants were asked to indicate if they had felt discriminated against in the past 12 months. This was asked as a yes or no question. Second, regardless of whether they had felt discriminated against, they were asked if they had personally experienced discriminatory events that were related to specific identity or demographic characteristics.

Undergraduate students were asked about whether they had felt discriminated against on the University of Illinois campus.

# Section A - Table 17: Felt Discriminated Against at University of Illinois campus in the Past 12 Months (% Responses) - Undergraduate Students

			Gender Identit	Race/Ethnicity		
	Total	Woman	Man	Transgender/ Non- Conforming	BIPOC	White
Felt Discriminated Against	<b>14.9%</b>	<b>15.7</b> %	<b>11.8</b> %	<b>24.0</b> %	<b>16.9</b> %	<b>12.3%</b>
	(393)	(241)	(119)	(12)	(246)	(146)

## Part 6: DEI Perceptions & Experiences

The next few items inquired about students' communities prior to attending the University of Illinois, with questions addressing the racial/ethnic composition of the community in which they grew up, and the composition of the school they graduated from.

### Section A - Table 23: Racial/Ethnic Composition of Previous Community by Student Population

# Section B — Employees (Staff & Faculty)

## Part 1: Data Collection & Methods

The population-specific to each section of this report is noted in each section header. Section B includes the results for the following:

- Population B: Employees
  - Employed at the institution as staff or faculty (permanent only) as of October 9, 2023.
  - Participants must have been 18 or older as of October 9, 2023.
  - A total of 9372 staff and 3576 faculty members were invited to participate in the survey.
  - Participants must have been in the United States at time of taking survey.

The following population-specific data collection methods were used to maximize the quality of this survey.

## **Respondent Incentives**

To encourage participation, all eligible study participants were entered into a random drawing to win various prizes.

- \$50 Amazon e-gift cards
- \$25 Amazon e-gift cards
- \$10 Amazon e-gift cards
- \$5 Amazon e-gift cards
- 500 Illinois Promotional Swag (T-Shirts, I-Block Winter Scarfs, I-Socks, I-Water Bottles).
- Grand Prize: Invitation to participate as an extra in a video featuring Chancellor Jones. (As part of this experience, they received a professional quality selfie with Chancellor Jones taken during the video shoot, as well as a personal email from him sharing the final video with the family member or friend of their choice.)

The random drawing was conducted after data collection was completed, and the incentive was delivered by the university to the winners.

## **Data Collection Schedule**

The overall data collection design protocol included:

- Invitation Email was sent on November 7, 2023
- Reminder 1 Email was sent on November 12, 2023
- Reminder 2 Email was sent on November 15, 2023
- · Paper Survey Mail was sent on November 17, 2023 (select staff)
- Reminder 3 Email was sent on November 20, 2023
- Reminder 4 Email was sent on November 25, 2023
- Reminder 5 Email was sent on November 27, 2023
- Reminder 6 Email was sent on November 30, 2023
- Reminder 7 Email was sent on December 8, 2023 (select employees)
- Reminder 8 Email was sent on December 12, 2023 (select employees)

The dates identified above for each data collection invitation represent the date the first communications (of each type) were sent. While most of the communications would have been sent the same day, depending on the time of day and any necessary data quality checks performed, some individuals may have received their communications on the next calendar day.

A second phase sample selection of employee non-responders was designed to compensate for trends in non-response bias. This sample received two additional reminder emails (reminders 7 and 8).

A paper version of the survey was mailed to approximately 700 select staff members to be more inclusive to staff members who may not have access to a computer.

## **Survey Completion Time**

Determining the time taken to participate in a web-based survey is not straightforward; however, standard practices were employed to calculate the average length of time for respondents to complete this survey.

The completion time for the questionnaire was calculated by computing the elapsed time between when the participant initially logged in and when they clicked submit on the final page of the web survey. Because participants could leave the survey and return to it later (returning to where they left off), which would lead to extended time durations "in" the survey, only individuals who completed the full survey in one session were included in this calculation.

Additionally, some participants may have completed a portion of the survey and remained logged in, but they may have been called away from the survey or distracted by other tasks. As such, we often find many outliers in the total time variable. As such, our standard practice to identify the outliers is to determine the median number of minutes spent in the survey by those who completed the survey in one session. A top-end outlier range was then set to be three times the median value. For example, if the initial median completion time was 15 minutes; anyone who took more than 45 minutes was considered an outlier who likely did not spend that full time working on the questionnaire. Anyone above three times the median time was also excluded from the final length calculation. This is a standard practice in the survey research industry to estimate an accurate time to complete a webbased survey. Because of the variability involved in estimating completion time, we only estimate one overall completion time across all populations in the study.

Web survey completion timetables show final estimates for the length of the web-based survey among the population identified in this section of the report.

### Section B - Table 1: Web Survey Completion Time (Minutes) for All Study Participants

	Original Median Time to Complete in minutes	Reasonable Maximum Time in minutes	Mean Time to Complete in minutes
All Participants	13.0	39.0	14.4

## Part 2: Dispositions & Response Rates

Disposition codes, response rates, and completion rates presented in this report are based on Standard Definitions as described by The American Association for Public Opinion Research (AAPOR) in their 2011 publication: Standard Definitions: Final Dispositions of Case Codes and Outcome Rates for Surveys, 7th edition.

## **Final Study Dispositions**

Survey dispositions were defined as follows:

- Eligible: An individual is determined to be eligible to participate if they were provided in the original sample file and they are determined to meet the eligibility criteria. Often some individuals are excluded from final eligibility due to them being duplicated in the file, they don't meet the age criteria, etc.
- Partial: An individual who consented but did not click "Submit Results" at the end of the survey.
- Complete: An individual who consented to participate and clicked through the entire survey (answering all or some questions), completed the incentive questions, and clicked "Submit Results."
- Ineligible: A case initially thought eligible to participate but determined not to be eligible (e.g., due to not being at least 18 years old); ineligible cases were removed from the denominator of all response rate calculations.

## **Response Rates**

Response rates for the survey were calculated as follows:

- Response Rate: Number of completes (c) plus the number of partials (p) divided by the eligible (e) sample size. This
  calculation follows AAPOR response rate calculation #2: ((c+p)/e).
- Completion Rate: Number of completes (c) divided by the sum of completes (c) plus partials (p): (c/(c+p)).

An individual is considered to have responded to the survey if their submission met the stated criteria to be considered a complete or a partial. Data from all such cases is included in this report. Response and completion rates are shown for the total number of individuals at the University of Illinois who responded to the survey.

### Section B - Table 2: Response & Completion Rates by Employee Population

		Eligible Sample	Partial Responses	Completed Responses	Response Rate	Completion Rate
Staff		9347	516	4417	52.8%	89.5%
Faculty		3519	208	1526	49.3%	88.0%
Total		12866	724	5943	51.8%	89.1%

## Part 3: Results

## **Reading the Results**

Because the study was designed in part to provide insights and information that could be used to assist in developing programs, key comparison groups are included in the tables. Summary tables in this report include a total column named "Total." This column shows the combined data of all individuals who completed the survey from among the population defined by this report.

Due to the nature of the voluntary confidential survey, respondents were not required to answer any substantive questions. Only two questions, one asking whether the study participant was responding to the survey from a location in the U.S. and the second asking for their age were required to proceed. This was because these items were necessary to confirm eligibility in the survey. If a potential respondent did not consent to participate, they were not shown subsequent survey questions.

Because participants could choose to skip any question(s) they did not wish to answer, the number of responses varied by question. Additionally, we have included partial responses in these results, so some drop-off as participants continued through the questionnaire is expected.

To preserve confidentiality, the following criteria was used to determine if data would be suppressed:

Data is suppressed at the column level in this report. This means that for any column represented in the tables included in this report, we evaluated the total number of cases (responses) included to generate the statistics shown in the column. If there were fewer than 15 cases represented, all data for the column was suppressed, and a dash (—) was shown in each suppressed cell.

The exception to this rule is in the Demographics tables of this report, no suppression was implemented. The Demographics tables include:

- Executive Summary Tables 2 through 9.
- Section A Tables 3, 3.1, and 3.2.
- Section B Tables 3, 3.1, and 3.2.

This suppression strategy was applied to the overall University of Illinois Urbana-Champaign report.

All suppressed data will be shown as a dash (-) within the data cell.

## Interpreting the Results

This effort is intended to provide the institution with the data and results so that local individuals can use them, together with their local knowledge of these issues, to come up with interpretations and meaning.

## Part 4: Demographics

To best understand the survey results, it is important to get an understanding of who completed the survey. The first section of the survey asked about several background and demographic elements. Characteristics of the responding population identified in the header of this report are shown in the Selected Demographics tables.

## **Primary Demographics**

### Section B - Table 3: Selected Demographics by Employee Population

	St	aff	Facu	lty
Age				
Average (Years)	44.5	(2765)	47.0	(925)

## Black, Indigenous & People of Color (BIPOC) Reporting

We recognize the critical need to disaggregate the data in order to understand the experiences of diverse communities at the University of Illinois. The data in this report is disaggregated by race/ethnicity and gender except in places where breakouts of individual race/ethnicity and gender categories will result in cell sizes that are too small to report. Therefore, we are also presenting a collapsed version of race/ethnicity, which is abbreviated in report columns as BIPOC (meaning "Black, Indigenous, and People of Color"). This category will include any participant who identified as African American/Black, Asian American/Asian, Hispanic/Latino/a, Middle Eastern/North African, Native American/Alaskan Native, Native Hawaiian/Other Pacific Islander, or Multiracial. Gender identity categories are Woman, Man, and Transgender/Gender Non-Conforming.

The following table shows the breakdown of the BIPOC categories for the populations covered by this section.

### Section B - Table 4: Collapsed Race (BIPOC) Demographic Distribution of Respondents by Employee Population

	St	aff	Facu	lty
BIPOC	23.1%		38.9%	(355)
White	76.9%	(2109)	61.1%	(558)

SOUNDROCKET™

Next, respondents were asked to rate their overall satisfaction with the campus climate/environment based on their experiences in the past 12 months.

Participants were asked about their level of satisfaction with the university's commitment to DEI over the past three years. Next, they were asked to rate the DEI climate compared to three years ago. Participants who had been at the institution for less than three years were instructed to consider their time there when answering the question.

After considering the DEI climate at the institution over the past three years, survey participants reflected on several sets of opposite DEI-related aspects using a semantic differential scale. In this scale, polar adjectives (opposite-meaning terms) are shown. Survey participants select a rating for each aspect that they feel best represents their perception of the entity being studied – in this case, individual perceptions of the overall campus community.

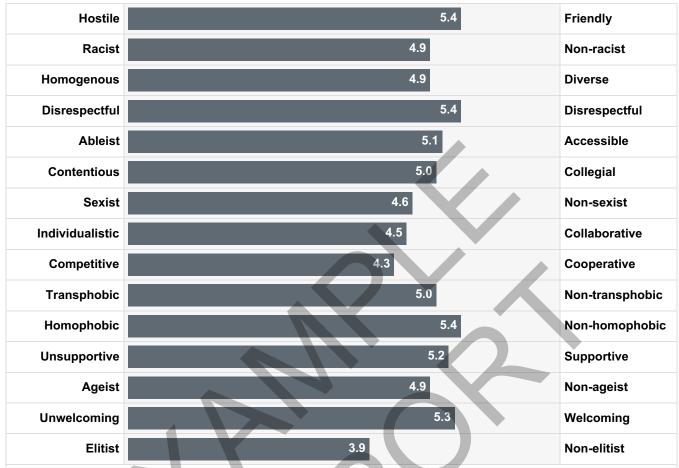

In the following chart, the higher the mean score shown in each bar, the closer ratings were to the positive attribute in each set of adjectives located on the right. A 7-point scale was used to evaluate the paired adjectives, thus the mean values in the following tables utilize the same scale.

† Note: respondents chose one of seven radio buttons in the survey spaced equally between opposite attributes; for analysis purposes, a 7-point scale was used in which 1=negative attribute and 7=positive attribute, mean ratings are calculated based on this 7-point scale.

#### Section B - Table 11: Employee Perceptions of Overall DEI Aspects (Mean Ratings)† - Faculty

† Note: respondents chose one of seven radio buttons in the survey spaced equally between opposite attributes; for analysis purposes, a 7-point scale was used in which 1=negative attribute and 7=positive attribute, mean ratings are calculated based on this 7-point scale.

Exploratory factor analysis (EFA) is a statistical technique that condenses data by grouping variables into factors (sets of variables) based on shared variance, the statistical index of the degree to which two variables are associated (shared variance is indicated by correlation coefficients). Thus, the goal of EFA is to identify related underlying constructs within the survey responses to help make the data more comprehensible and useful for practical applications.

The EFA on the semantic differential items answered identified two factors, which included thirteen of the dimensions items: (1) General Climate Elements and (2) DEI Climate Elements. The variables that make up each of the factors are:

	_
Factor 1 General Climate Elements	
Hostile / Friendly	
Disrespectful / Respectful	
Contentious / Collegial	
Individualistic / Collaborative	
Competitive / Cooperative	
Unsupportive / Supportive	
Unwelcoming / Welcoming	

Factor 2 DEI Climate Elements Racist / Non-racist Sexist / Non-sexist Homophobic / Non-homophobic Ageist / Non-ageist Transphobic / Non-transphobic Homogenous / Diverse

Survey participants were asked to respond to a series of questions about various aspects, experiences, and perceptions of working or studying at their campus. Individuals rated their level of agreement with each statement using the following five-point scale: Strongly Disagree (1), Disagree (2), Neither Agree Nor Disagree (3), Agree (4), Strongly Agree (5). The following table shows combined responses for "Agree" plus "Strongly Agree" (4 + 5) ratings.

To further explore the aspects asked about in the previous tables, we calculated three Custom indices to provide insight about Sense of Belonging, DEI Commitment, and Opportunities for Success. Each question allowed the participant to answer Strongly Disagree, Disagree, Neither Agree nor Disagree, Agree, or Strongly Agree. We converted these categories into numeric values, assigning 1 to Strongly Disagree up through 5 to Strongly Agree. Where an item was reversed to reflect a negative experience instead of a positive one, the scoring was reversed as well, as indicated below.

We then calculated a mean composite score for each index. Each index contains a different question set which is listed below. A case must have had at least two of the items to be calculated—otherwise, the mean was not calculated and the case was not included in the analysis.

#### Sense of Belonging

- I feel valued as an individual at the University of Illinois.
- I feel I belong at the University of Illinois.
- I have found one or more communities or groups where I feel I belong at the University of Illinois.
- I have considered leaving the University of Illinois because I felt isolated or unwelcomed. (Reverse Coded)

#### **DEI Commitment**

- The University of Illinois has a strong commitment to diversity, equity, and inclusion.
- There is too much emphasis put on issues of diversity, equity, and inclusion here at the University of Illinois. (Reverse Coded)
- The University of Illinois provides sufficient programs and resources to foster the success of a diverse student body/staff/community of scholars.

#### **Opportunities for Success**

- I am treated with respect at the University of Illinois.
- I feel others don't value my opinions at the University of Illinois. (Reverse Coded)
- I have opportunities at the University of Illinois for academic/professional success that are similar to those of my peers/colleagues.
- My experience at the University of Illinois has had a positive influence on my academic/professional growth.

#### Part 6: DEI Perceptions & Experiences

After responding to questions thinking about the campus as a whole, employees were instructed to respond to overall satisfaction with the climate/environment at their campus based on their work experiences over the past 12 months.

The final set of survey questions asked survey participants to rate conditions in their time as an employee. If they taught/worked in two departments/units, they were requested to "choose one to rate for this survey."

First, faculty were asked to describe their agreement with a series of statements about how they are valued within their department/unit.

The survey continued with questions related to whether survey participants have personally felt or experienced some form of discrimination at their campus during the past 12 months. There were two primary items within each discrimination group—first, participants were asked to indicate if they had felt discriminated against in the past 12 months. This was asked as a yes or no question. Second, regardless of whether they had felt discriminated against, they were asked if they had personally experienced discriminatory events that were related to specific identity or demographic characteristics.

#### **Use of Findings & Next Steps**

The results of this survey underscore the importance of regularly collecting data to provide campus leadership and the broader community about experiences surrounding diversity, equity, and inclusion. Further analyses of survey results will be conducted to inform the work of the University of Illinois Chicago in developing enhanced education and programming efforts, to ensure that ample support is available for individuals who experience discriminatory events, and to bridge gaps in knowledge and/or understanding of all policies and resources regarding DEI at the University of Illinois.

#### Confidentiality

To ensure success of this survey, given the sensitive nature of several of the questions, a key element of the study design was to limit direct access between the institution and those individuals who were being surveyed. Integral to this effort was the use of an independent contractor (SoundRocket) for data collection efforts, which provided a firewall between respondents' identity and their survey responses. Consistent with standard practices for confidential data collections such as this, SoundRocket was required to use encryption technologies (including SSL for all web-based interfaces) and adhere to strict guidelines to maintain data security and confidentiality. SoundRocket has been collecting sensitive data from university populations since 2004. SoundRocket communications, staff training, processes and guality inspections all focus on minimizing disclosure risk.

The participant list was provided to SoundRocket. After the study was completed, SoundRocket destroyed all identifiable data (electronic and paper) that was received in the effort.

#### **DEI Resources**

The University of Illinois Chicago All Campus Climate Assessment is one component of the comprehensive campus wide plan to foster and strengthen diversity, equity and inclusion at the university. The information included in this report may be used to help shape DEI plans across the U of I – as well as within colleges and departments. For questions about the All Campus Climate Assessment, please contact <u>AllCampusSurvey@uic.edu</u>.
